Efficient Iron Supplementation
Nano-encapsulated iron Technology

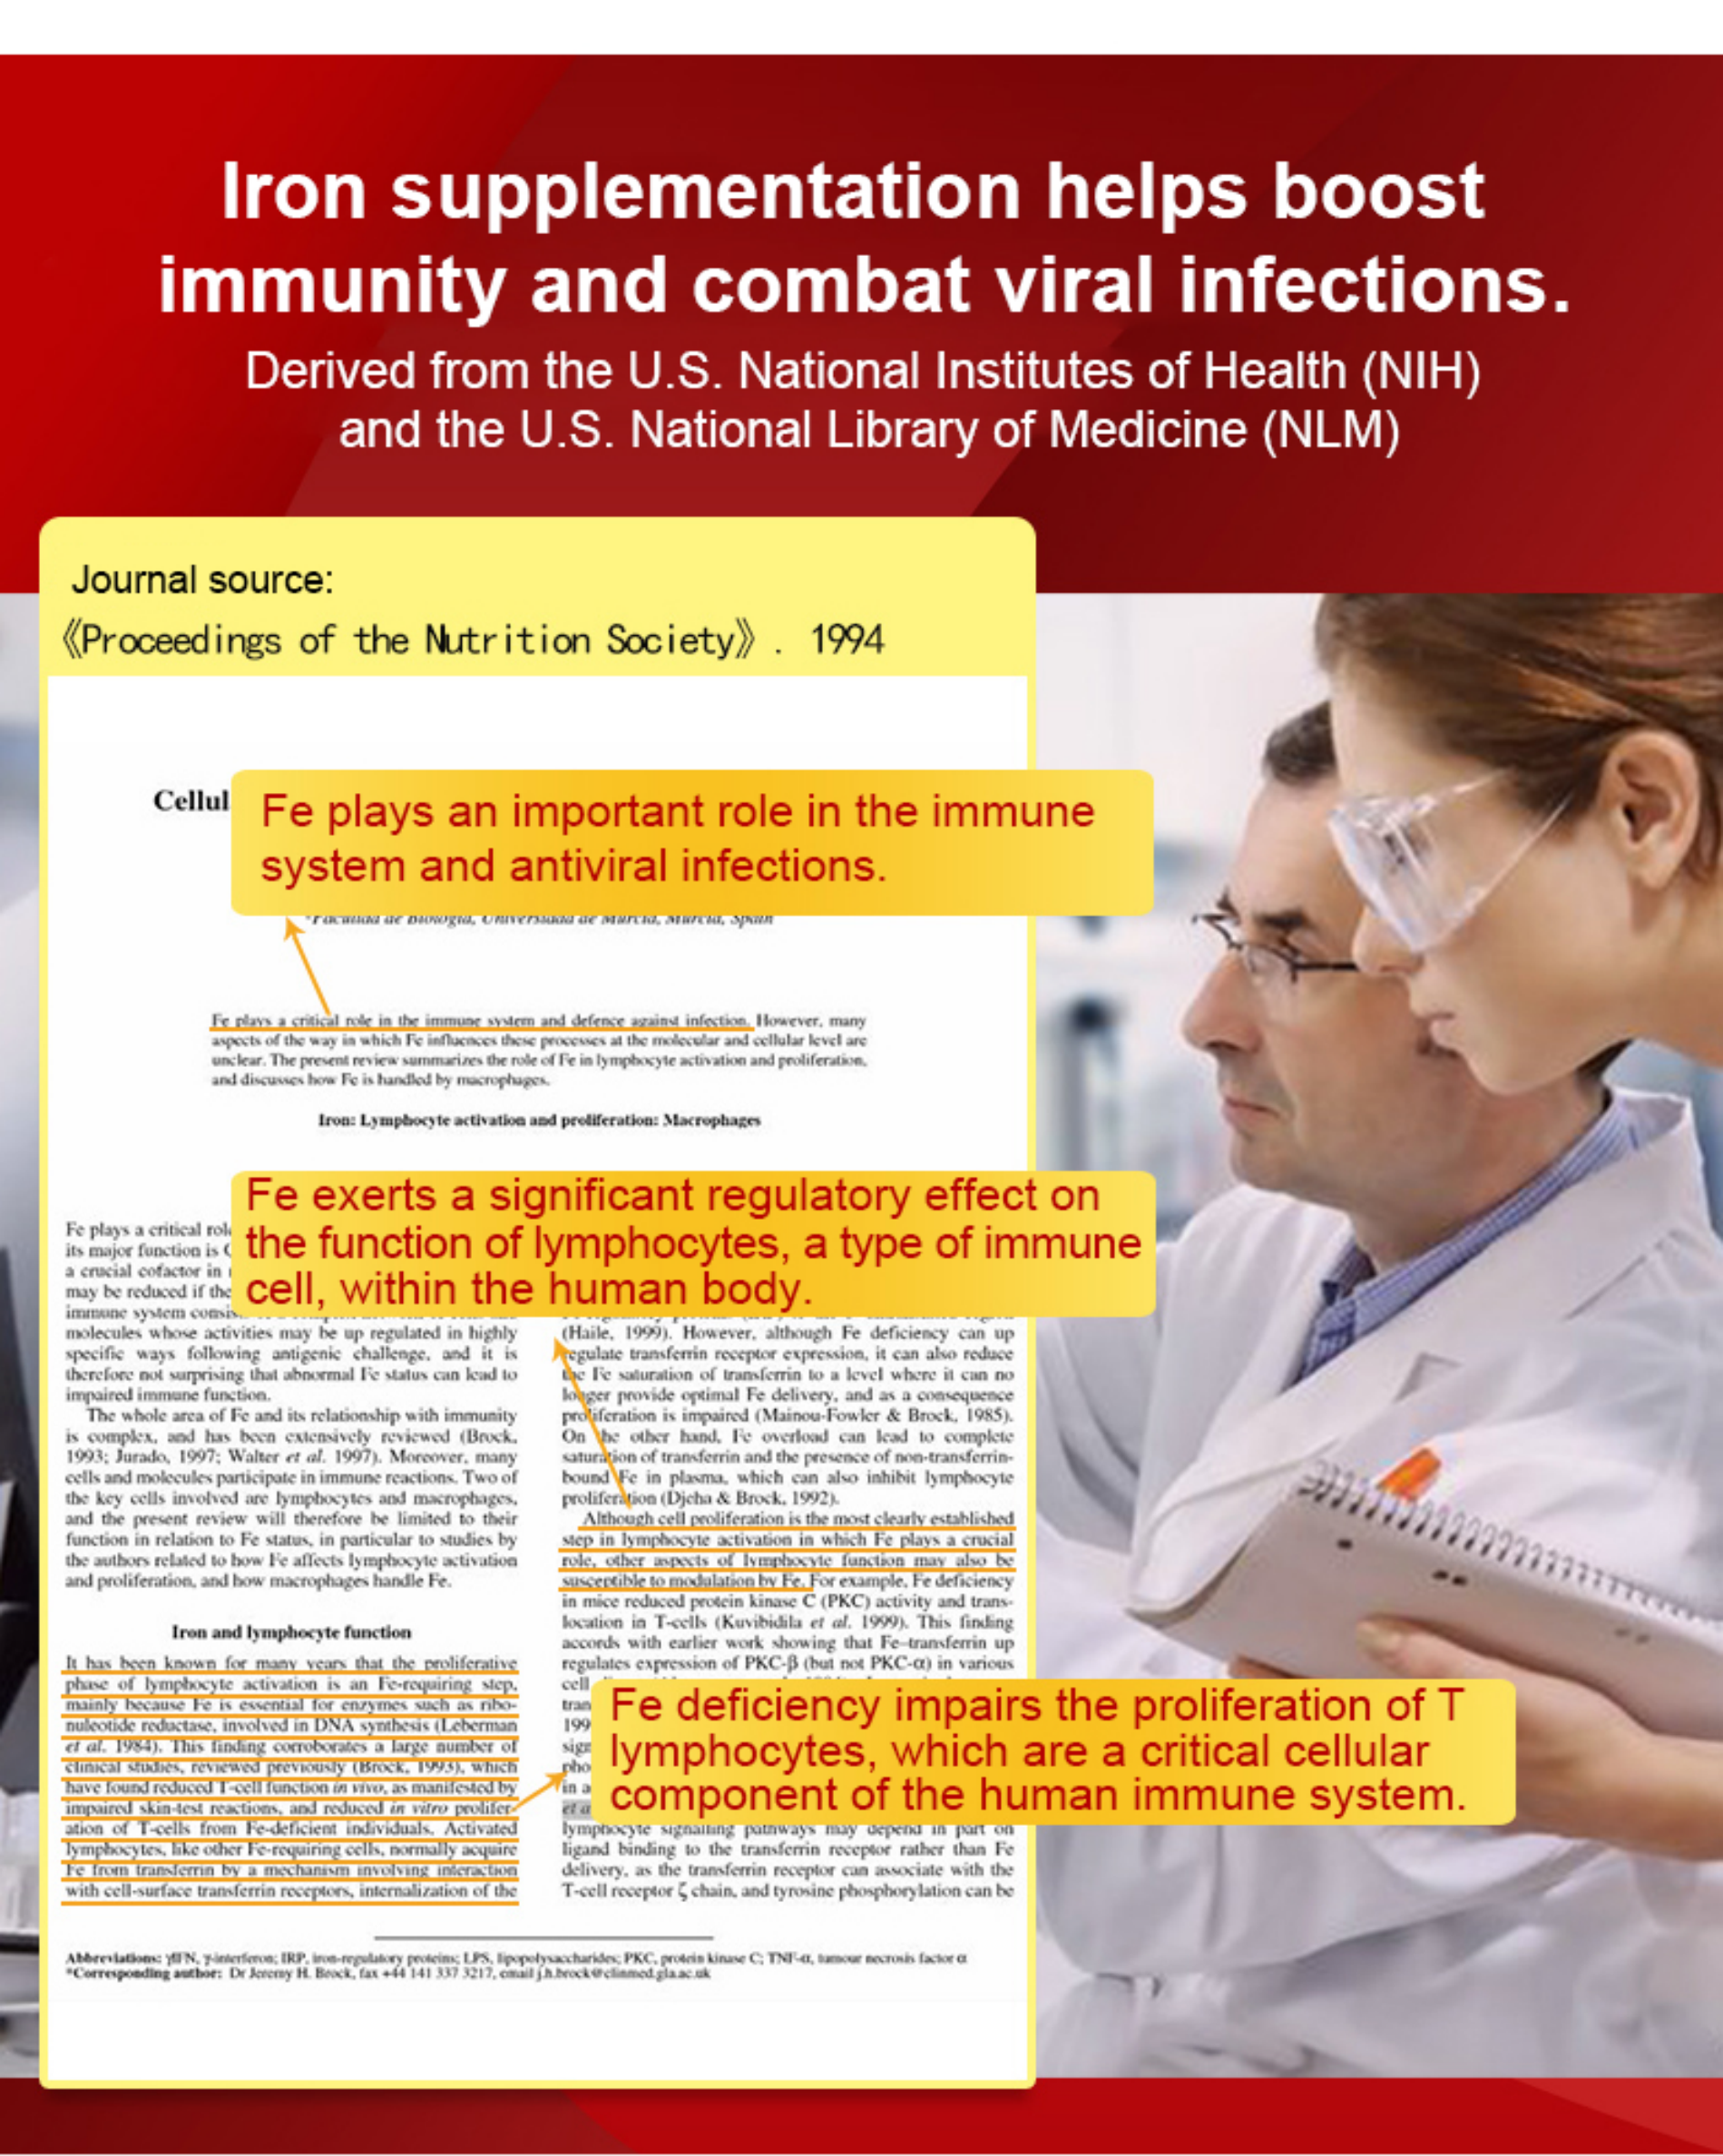
Fast
Fast absorption
Fast-acting

Gentle on the stomach
Not black teeth
Not constipated

Zero sucrose, no fishy odor
and pleasant taste.

Iron supplementation helps boost immunity and combat viral infections.

Derived from the U.S. National Institutes of Health (NIH) and the U.S. National Library of Medicine (NLM)



Journal source:
《Proceedings of the Nutrition Society》. 1994

Fe plays an important role in the immune system and antiviral infections.

Fe plays a critical role in the immune system and defence against infection. However, many aspects of the way in which Fe influences these processes at the molecular and cellular level are unclear. The present review summarizes the role of Fe in lymphocyte activation and proliferation, and discusses how Fe is handled by macrophages.

Iron: Lymphocyte activation and proliferation: Macrophages

Fe exerts a significant regulatory effect on the function of lymphocytes, a type of immune cell, within the human body.

Iron and lymphocyte function

Fe deficiency impairs the proliferation of T lymphocytes, which are a critical cellular component of the human immune system.

Product Information

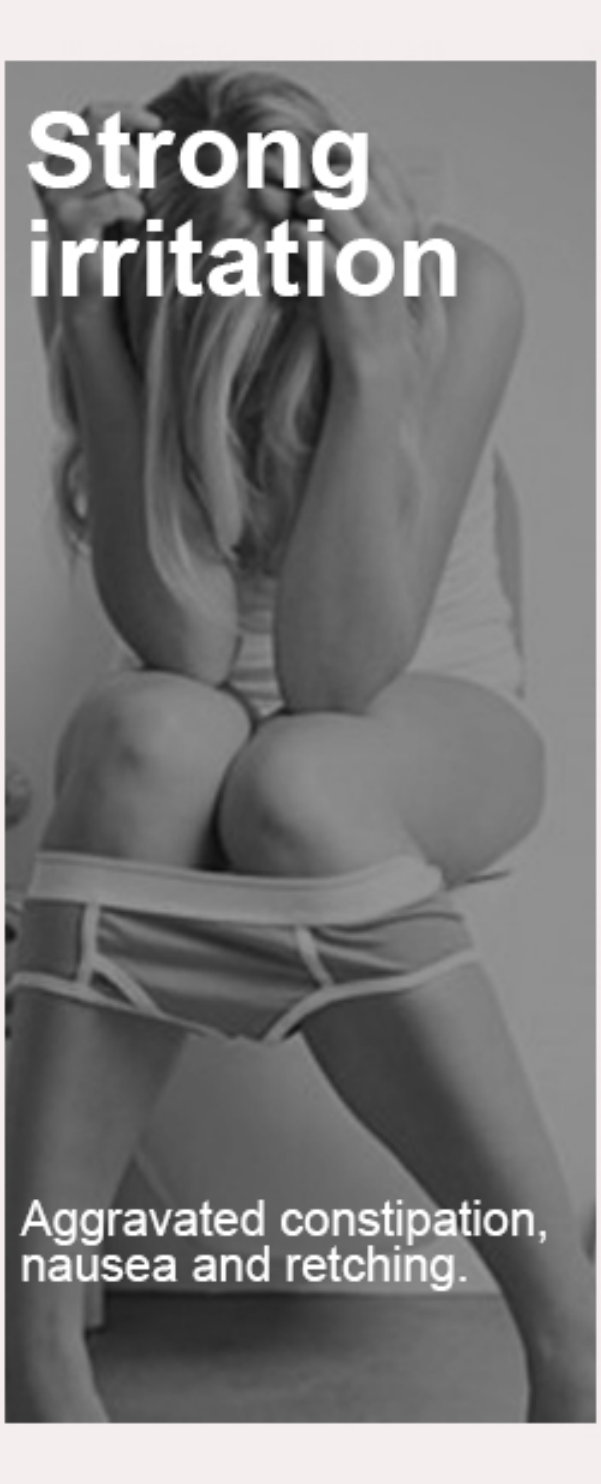
Product Name: Iron-rich vitamin liquid sugar-free drink
Iron Content per Sachet: 18mg
Specification: 15ml × 20
Suitable Population: People aged 3 and above
Usage and Dosage:
1. Take one sachet once a day. Tear open the aluminum foil sachet and consume directly, or use the attached straw for drinking.
2. It can also be taken after dissolving in warm boiled water.

This product is developed and technically licensed by the USQLAnti-aging Research Center and LG Bionano,LLC in the USA.

The consequences of blind iron supplementation are more terrifying than you think!

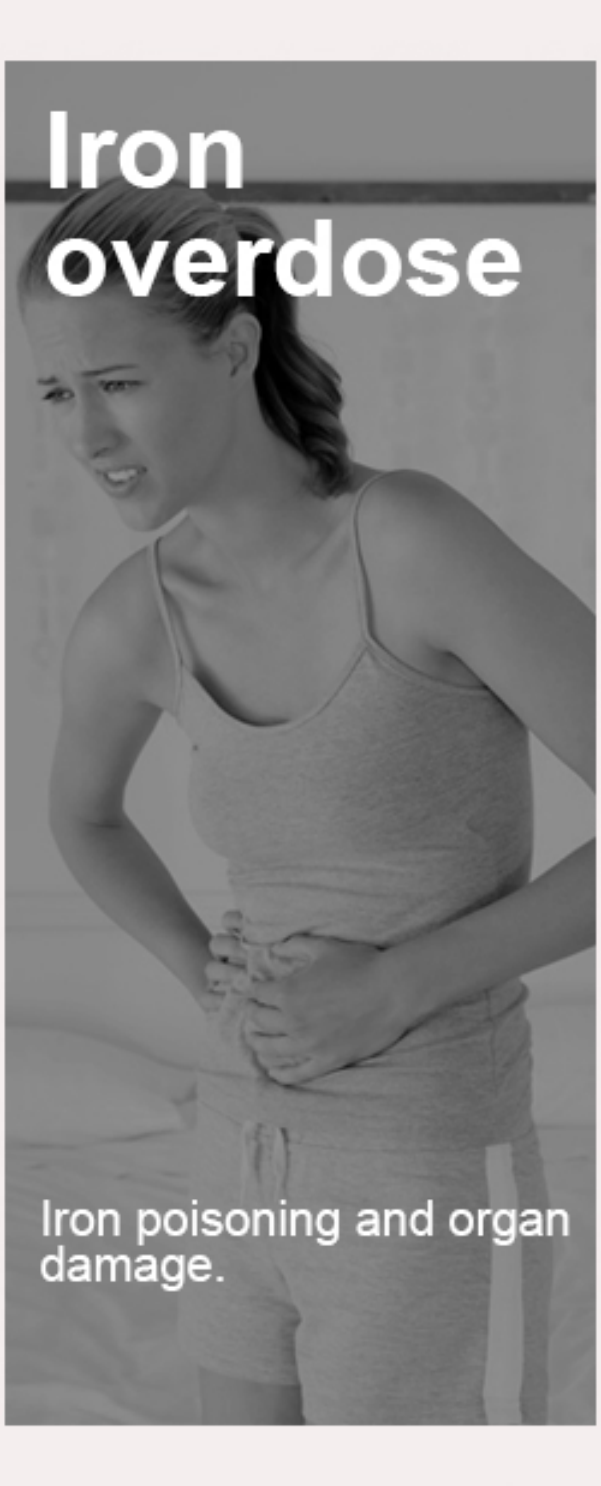
Poor absorption

Iron levels drop even with supplementation, and anemia shows no improvement.



Strong irritation

Aggravated constipation, nausea and retching.



Iron overdose

Iron poisoning and organ damage.

Efficient iron supplementation—choose professionalism
Recommended by top U.S. pharmaceutical experts

Nano-encapsulated iron

Ideal for individuals suffering from iron deficiency anemia.

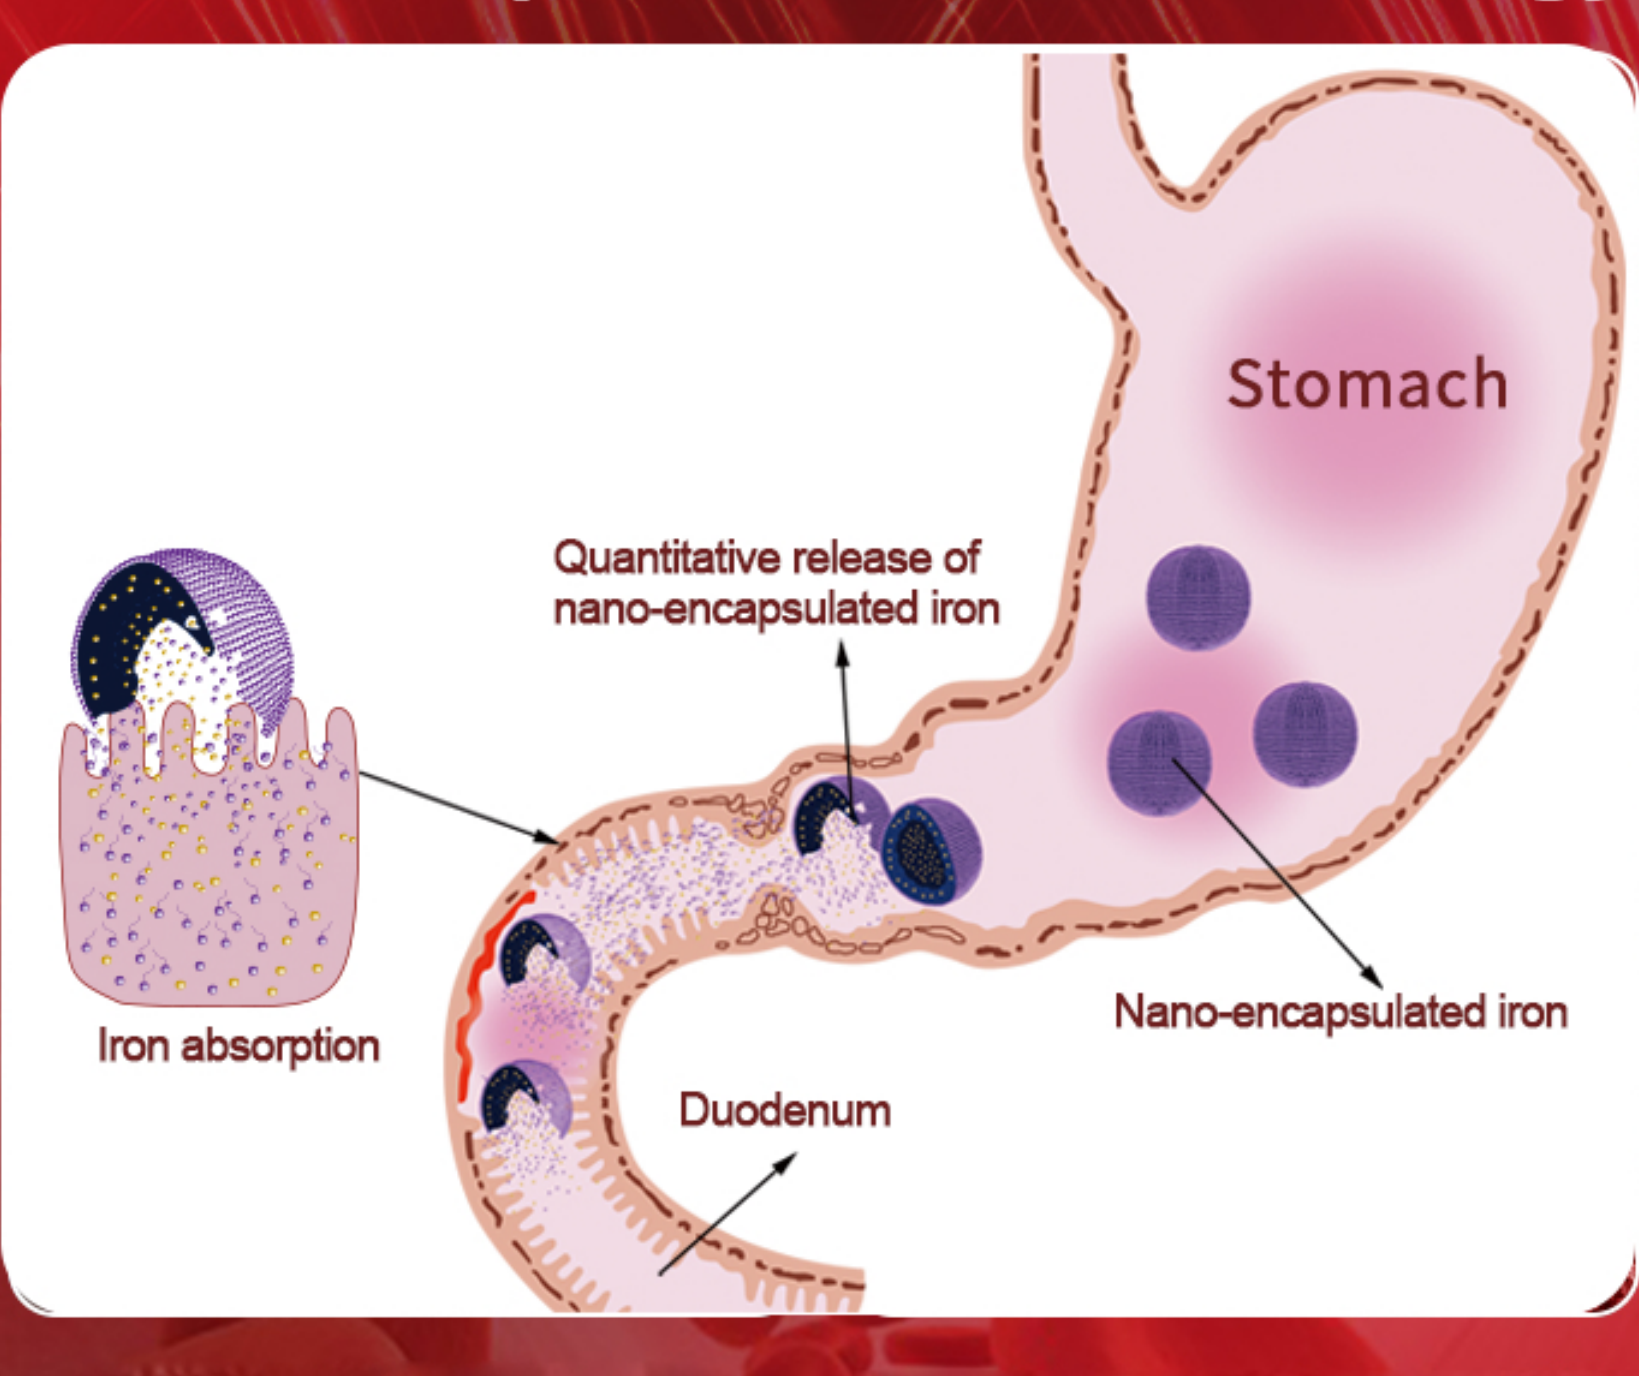
Nano-encapsulated iron Technology

Iron-rich vitamins with next-generation nano-encapsulated iron technology



Stomach
Quantitative release of nano-encapsulated iron
Iron absorption
Nano-encapsulated iron
Duodenum

Nano-encapsulated iron directly targets the required sites and releases iron ions for rapid iron supplementation

Identify iron deficiency level and release on demand:
Nano-encapsulated iron releases iron based on the body's actual iron deficiency, avoiding excessive iron-induced toxicity

Ordinary divalent iron supplements on the market cannot release intelligently, making iron overload highly likely and causing serious harm to the body!

~~Constipation~~ ~~Abdominal pain~~ ~~Nausea~~ ~~Regurgitation~~

Are you iron deficient?

Iron deficiency causes obvious qi and blood insufficiency, leading to weakened visceral function and various health issues

numbness of limbs & cold hands

shortness of breath & mood swings

easy fatigue & dizziness

qi and blood insufficiency irregular menstruation

decreased resistance & frequent colds

affecting fetal development

dull rough skin dull hair & hair loss

iron deficiency anemia

pale brittle nails
